Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application

☒ claims Nos. 4

because:

☐ the said international application, or the said claims Nos. 4
relate to the following subject matter which does not require an international preliminary examination (*specify*):

☒ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. 4
are so unclear that no meaningful opinion could be formed (*specify*):

Claim 4 is unclear because it includes an error
message (French text: "... des revendications 1 à
Erreur! Source du renvoi introuvable., ...")

☐ the claims, or said claims Nos. _____ are so inadequately supported
by the description that no meaningful opinion could be formed.

☐ no international search report has been established for said claims Nos. _____

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

D1: FR-A-2 262 167

2.1 Independent claim 1

- 2.1.1 Document D1 describes (the reference signs between parentheses apply to this document) a beam support system (see, in particular, figures 1, 2 and 7) including two posts (pillars 2 and 2a), a beam (central beam 5) and at least one tie member (turnbuckle 9), wherein the posts (2, 2a) are biased apart by the beam (5) and biased towards one another by the tie member (9), and the beam (5) is connected to the tie member (9).

- 2.1.2 The aim of the invention is to enable spontaneous adjustment of the beam relative to the tie member, especially when the beam is subjected to an asymmetrical load.

PCT/FR2004/001722

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability: citations and explanations supporting such statement
2.1.3	The solution lies in the fact that the beam (3, 3a, 3b) and the tie member (9, 9a, 9b) are slidably mounted along a finite sliding portion.
2.1.4	The combination of features in claim 1 is not found in or obvious from the prior art. It follows that the subject matter of claim 1 is novel and inventive.
2.2	Claims 2, 3 and 5 to 8 are dependent on claim 1, meaning that their subject matter is also novel and inventive.
2.3	The subject matter of claims 1 to 3 and 5 to 8 is industrially applicable.
3.	<u>Observations:</u>
3.1	To comply with the requirements of PCT Rule 6.3(b), the independent claim should have been drafted in two parts, with a first part containing the combination of features known from the prior art.
3.2	The text of the description should be made consistent with that of the new claims to be filed. In doing so, care should be taken, particularly as far as the introductory part setting forth the problem or the advantages is concerned, to ensure that the subject matter of the application does not go beyond the content of the application as filed (PCT Article 34(2)(b)).

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

- 4.3 To comply with the requirements of PCT Rule 5.1(a)(ii), the applicant should have cited Document **D1** in the description, indicated the corresponding prior art, and specified the **problem** that the invention solves, because an inventive step can be considered to be the distance between a technical problem and the solution thereto, and the provisions of PCT Rule 5.1(a)(iii) stipulate that the description must set forth the way in which the invention can be considered to be a solution to a technical problem.
